Our philosophy

We care your patient as much as you do.

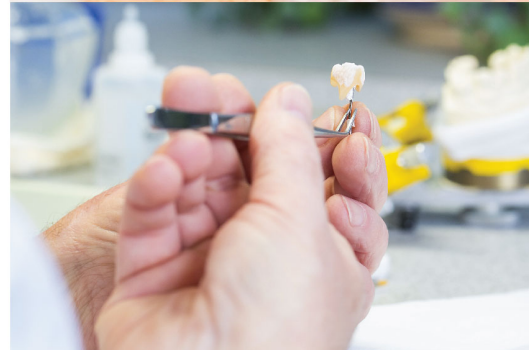

We are creating an organ for our patient, smile and function combined.

About us

We are a group of experienced, professional dental technicians providing all round dental prosthetic, utilising the best materials that promise aesthetics, superior strength and long term performance.

We focused on Full Zirconia Ceramics, Implant, Orthodontic Appliances and Dentures, giving you the best support to your patients.

Full Ceramic

Zirconia Crown & Bridge

We utilise the highest quality materials from USA Segamaxx for all Zirconia Crown cases. Total product control is achieved from our in-lab milled Zirconia copings through to the layered Ivoclar Vivadent porcelain.

IPS e.max® is a modern and innovative system which covers the entire spectrum of all-ceramic indications ranging from thin veneers to non-prep veneers. It includes materials of exceptional aesthetics and high strength for the pressing technique.

Dentures & Graphic

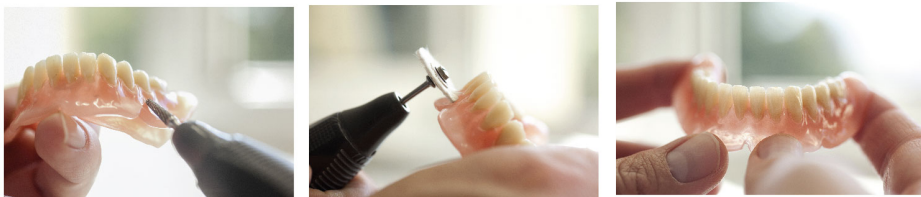

Denture

Our traditional dentures and partials feature premium teeth and frameworks for any budget. Careful case planning simplifies delivery of dentures and partials from Triple T. Our highly-trained technicians have an advanced technique and wide experience in partial denture designs. This experience ensures our castings are produced with the patient's specific needs especially in mind. Quite simply, our staff design the denture as if we were fitting it in the patients mouth ourselves.

We use high-tensile-strength cobalt chromium and design the finest ultra thin frameworks and strong, clasps that are stain-resistant and lightweight. We can also coat anterior pins, backings and clasps as well as we are also able to do castings in Titanium.

Flexible Dentures

It is possible to supply your patients with an aesthetically pleasing partial denture. The Valplast™ partials are a metal-free, flexible dental resin that offers your patients lightweight comfort and strength. Since the clasps on the partials are clear or tissue tone, they seem to disappear when in the mouth, making this an excellent alternative to a cast partial with clasps.

MSDS

Denture Acrylic: Ivoclar Vivadent - Probase Hot / Cold

Denture Teeth set: Japan Yamahachi

Denture Alloy: Bego Wironium

Denture Alloy: Dentsply Vitallium

Flexible Denture: Valplast TCS
